

Leave the instructions on the table , do not take them with you.

LED Flasher assembly instructions

Install the components in the following order

- Resistors - 3 (use the lead bending tool - 10mm)
- IC Socket -1
- Electrolytic capacitor
- LED - ask a leader for help with this before soldering it in
- Battery Holder

Resistor

LED

Electrolytic Capacitor

IC Socket

Get your soldering and component placement checked before proceeding

- 7555 IC and Battery - You will be given this when your soldering has been checked and the Battery socket has been soldered in.
- Write your name and Scout Group on the back in the space provided.
- Get a piece of protective Kapton tape put on the back

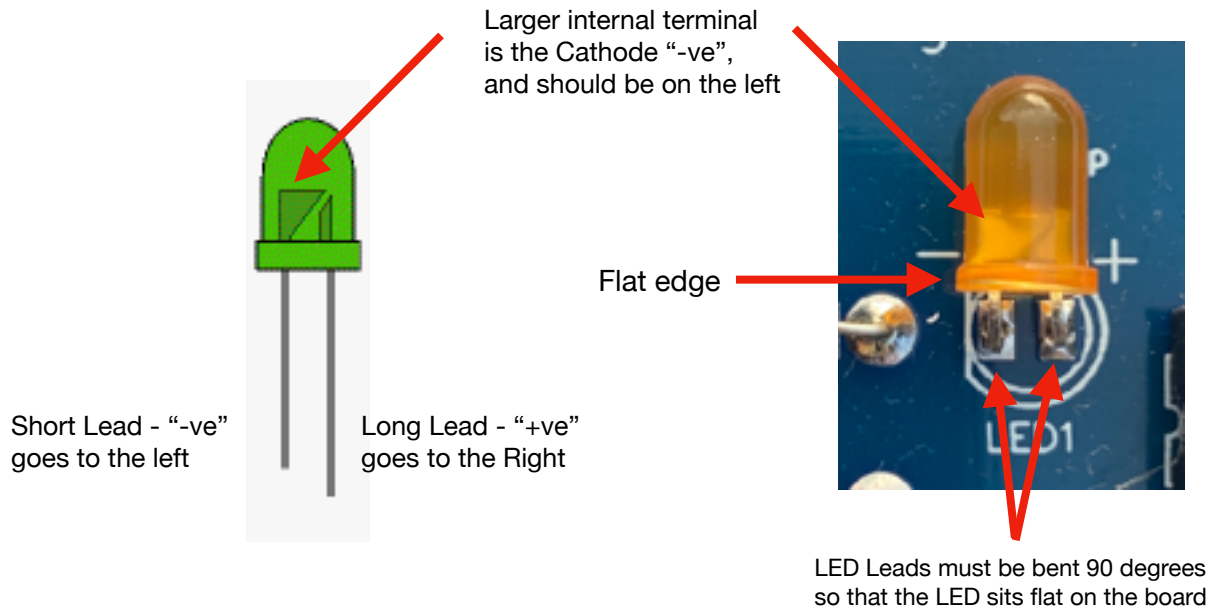

Leave the instructions on the table , do not take them with you.

LED Flasher assembly instructions

LED

It must go in the right way, otherwise it will not work.
Bend the leads so that the LED sits flat on the board.

Battery holder

Take the cover tape of the double sided tape before putting the battery socket into the board.

Kapton tape

Get a piece of Kapton tape to cover the soldered

Name and Group
Write your name and Group on the back in the space
